Objective

Frontend Developer with 2+ years of experience in building responsive, user-friendly web applications and software, using JavaScript, React.js, Next.js, tailwind CSS and other Modern web technologies. Eager to contribute clean and maintainable code and grow in a collaborative work team.

Experience

- **ALX Africa**   August 2022 - January 2024
  Software Engineer Training
  - Worked on various software development projects, both frontend(react) and backend(python) and SQL databases.
  - Participated in code reviews and maintainance of high standards of code quality
  - Collaborated with individuals from different African countries in teams through GitHub to deliver solutions and quest objectives that meet industry standard within specific deadlines.

- **Sync Interns**   September 2023 - October 2023
  Web developer
  - Developed responsive web pages using HTML, CSS, JavaScript and React.js
  - Gained hands-on experience in frontend development and learned best practices in web hosting technologies.

- **Flexisaf Edusoft**   May 2025 - Present
  Frontend Developer intern
  - Developed and maintained Ui for ed-tech platforms serving 300+ university students to improve usability and structure.
  - Collaborated with backend team to integrate APIs and enhance functionality of existing application codebase.
  - Ensured cross-browser compatibility, responsiveness and optimization of applications for speed and to reduce size.

Education

- **Alex Ekwueme Federal University, Ebonyi, Nigeria**   2018 - Graduated 2023
  B.sc Criminology & Security studies

Skills

- Programming languages: JavaScript, Typescript, and Python
- Frameworks & Libraries : React.js, Next.js, Bootstrap, Tailwindcss, Flask
- Tools & Technologies : proficiency in Git & GitHub workflows, React-query and Zustand.
- Development Practices : Frontend development and full-stack development

Projects

- **Solarscript**
  4 page website for marketing a solar installation company. A home page, about, contact and gallery page showing the company's available services and completed work photos.
  https://solarscript.com.ng

  Technologies used include: Nextjs, Reactjs, Bootstrap css

- **Minify**
Mini e-commerce website showing a few products and images, with features like star ratings, functional add to cart button, dynamic page routing for all products, checkout page with list of all the products added to cart and total prices, remove button for removing products and the payment button.
https://minify-ecru.vercel.app

  Technologies used include: Reactjs, Zustand, React-query, tailwindcss, Typescript

- **Portfolio website**
Built my portfolio website using nextjs. Showing my personal projects and contact information.
https://eustacembanefo.vercel.app

  Technologies used: Nextjs, Reactjs, CSS

- **Weather app**
Built a weather app with real-time weather forecasts. Integrated openweather API into it for daily, hourly, and weekly forecast data.
https://weather-app-two-kappa-68.vercel.app

  Technologies used: Reactjs, CSS

- **Croix stores**
A static, simple and responsive, single page E-Commerce store with products and ratings.
https://croix-stores.netlify.app

  Technologies used: HTML5, CSS, Javascript

Languages

- English - Fluent

Personal Details

- Nationality : Nigerian
